

I travel heavily by automobile throughout the United States and Canada on business. XM radio's Instant Traffic & Weather service provides much need data as to road and westher conditions. It is most convenient being able to immediately obtain this data from one preselected channel, anywhere in North America. Try searching for the same information on the AM or FM dial in a strange area. It DOESN'T HAPPEN! I urge the FCC to Reject the NAB's petition 04-160 as being totally baseless.
